## **FOREWORD**

The County Government has been implementing the County Development Agenda as encapsulated in the County Integrated Development Plan CIDP (2023-2027). This is done through Annual Development Plans (ADPs). The ADP 2024/25 is the second under CIDP 3. The ADP preparation process was guided by Section 126 of the Public Finance Management Act, 2012, and in accordance with Article 220 (2) of the Constitution. The County Annual Development Plan (ADP 2024-2025) is an important document in the budget making process. This plan provides a framework that will guide the implementation of programs and projects in the 2024/2025 financial year, with a view of enhancing transparency and accountability to facilitate the realization of the planned county development aspirations as envisaged in the CIDP 2023-2027. Various strategies have been proposed under each sector with an overall goal to improve the welfare of the people of Migori County.

This document was developed in a consultative and participatory manner in line with the constitutional requirements of public and stakeholder participation and engagement. Programs and sectoral priorities were identified in line with County and National Development Blueprints including the Governor's Manifesto, Sectoral Plans, Bottom-Up Economic Transformation Agenda (BETA), Vision 2030, among others.

Implementation of the ADP FY 2024/25 will require coordinated efforts and commitment from all stakeholders within and without the County. The Office of the Governor will provide the overall strategic leadership on its implementation. Towards this end, the county government will continue to mobilize resources and improve structures and systems to facilitate better management of resources.

## ACKNOWLEDGEMENT

The County Annual Development Plan (C-ADP) 2024-2025 was prepared through an intensive consultative process involving key stakeholders guided by the Department of Finance and Economic Planning. Special thanks to H.E Dr. Ochillo Mbogo Ayacko, the Governor Migori County, H.E Dr. Joseph G. Mahiri, the Deputy Governor and the entire County Executive Committee for their overall leadership, support and policy direction in the preparation of The Plan. I commend the County Secretary and all the Chief Officers for steering and coordinating mobilization of key technical staff in preparation of this plan.

I would also like to thank the Sector Working Groups (SWGs) and technical officers for their invaluable contribution and inputs to the plan. Special gratitude to the Director Economic Planning and Budget and the entire technical team of Economists and Statisticians in the department of Finance and Economic Planning for their commitment and teamwork during the process of developing this document.

Finally, the process would not have been accomplished without the support of the members of staff of the County Government, the public and the stakeholders who provided crucial information during our Public Participation forums.

It is my sincere hope that the ADP 2024-2025 will be valuable in guiding County departments and agencies, communities and non-State actors in formulation of policies, annual work plans and budgets

**Dr. John Oduyo Achuora**  
Chief Officer  
Finance and Economic Planning

## KEY DEVELOPMENT AREAS

The County Government of Migori has four key areas of focus for FY 2024/2025. These include;

### **1. Maintaining Fiscal Stability:**

Maintaining fiscal stability remains a top priority for the County Government of Migori. This will mean that expenditures do not exceed revenues, pending bills are reduced and a healthy reserve fund is maintained. Consequently, the County Government will do the following;

- Observe fiscal sustainability by ensuring budgetary decisions are financially responsible and do not create long-term fiscal challenges.
- Enhance revenue generation by implementing revenue policies that promote growth, diversification of revenue sources, and pursuit of new revenue streams as spearheaded by the new County Revenue Board.
- Implement cost containment by identifying and eliminating wasteful expenditures, promoting efficiency, and reducing administrative costs as spearheaded by the Chief Officer, Finance.

### **2. Providing Quality Public Services:**

Providing quality public services, such as education, healthcare, social, cultural and environmental services remains a top fiscal priority for the County Government of Migori. This involves ensuring that public services are adequately funded and that they meet the needs of citizens.

To improve the quality of public services being offered, the county government will carry out the following activities;

- Conduct a thorough review of existing services to identify areas where the quality of service delivery falls short of expectations.
- Develop a service improvement plan based on the feedback received, including timelines, budgets, and performance indicators to measure progress and identify areas that need further attention.
- Provide training and development opportunities for staff to enhance both technical and soft skills training, including customer service and communication skills.
- Invest in upgrading and maintaining infrastructure and equipment necessary for delivering high-quality services including vehicles, communication technology, and other resources needed to support service delivery.
- Develop systems and processes that promote transparency and accountability in service delivery, including tracking and reporting on service delivery performance, establishing a grievance mechanism for service users, and creating a culture of continuous improvement.
- Engage with service users and other stakeholders to get feedback on service quality and incorporate their views into service improvement efforts.

### **3. Investing in Infrastructure:**

The County Government of Migori will invest in infrastructure, such as roads and bridges. These are considered essential to promoting economic growth and improving the quality of life for citizens. That is why the roads, energy and ICT departments have been allocated 8.94% of the county resources despite the huge investments by development partners in the environment, health and agriculture sectors.

To accelerate investment in infrastructure, the County Government plans to;

- Engage with the private sector to leverage their expertise, resources, and innovation to accelerate infrastructure development through partnerships to design, finance, and deliver infrastructure projects, as well as through leveraging public-private partnerships (PPPs) to share risks and costs.
- Streamline regulatory processes and approvals to reduce delays and facilitate investment in infrastructure, including simplifying regulatory processes, reducing bureaucratic hurdles, and improving coordination with national government.
- Develop innovative financing mechanisms to mobilize additional funding for infrastructure development.
- Prioritize sustainability in infrastructure development by incorporating climate resilience, energy efficiency, and green infrastructure into project design and construction.
- Use data and analytics such as GIS mapping to inform infrastructure investment decisions and ensure that investments are targeted to areas of greatest need.

### **4. Promoting Economic Development and Empowerment:**

Another key priority for the County Government of Migori is promoting local economic development, which involves attracting new businesses, creating jobs, and fostering innovation.

To achieve this the county government plans to undertake the following;

- Create a supportive business environment by streamlining regulatory processes, reducing bureaucracy, and providing access to financing and technical assistance for entrepreneurs and small businesses.
- Invest in workforce development programs that provide training and support to workers to help them gain the skills and knowledge needed to succeed in both the local and international job market.
- Attract investment by creating a pro-business climate that offers incentives for businesses to locate and invest in the county such as tax incentives, infrastructure improvements, and other benefits to attract investment and support economic growth.
- Support entrepreneurship by providing resources and support to help startups and small businesses grow and succeed, including offering access to capital, mentorship, and other support services to help entrepreneurs start and grow businesses.
- Promote tourism by investing in attractions and marketing efforts to attract visitors to the county.

## EXECUTIVE SUMMARY

The 2024/25 Migori County Annual Development Plan (C-ADP) is the 2<sup>nd</sup> Annual Plan implementing the 3<sup>rd</sup> Generation County Integrated Development Plan 2023-27. The ADP outlines the strategic priorities, programmes and development agenda for FY 2024/25. The plan is prepared pursuant to legal provisions and principles set in Kenya's development agenda, guided by Kenya Vision 2030 and the Governor's Manifesto. The plan ensures Sustainable Development Goals (SDGs) are mainstreamed into the County's development agenda.

The ADP seeks to ensure full implementation of development priorities envisioned in CIDP 2023-27 whose main objective is to increase household income for sustainable livelihoods. The development theme for FY 2024/25 will be "Strength In Diversity". The theme pushes for revitalizing economic development at the community level by engaging citizens while at the same time building the resilience and the adaptive capacity of the community members.

The ADP aims to achieve its objectives through enhancing climate change adaptation and water access to households; improving the livability in the county's urban areas and markets; improving service delivery through institutional strengthening and capacity development; improving access to universal health coverage; increasing agricultural production, value addition and market access and enhancing social protection for the vulnerable in society.

The delivery of the objectives will be championed through enhancement of the county multi-sectoral approach/whole of government approach of implementing development priorities, monitoring, reporting and learning. The development agenda draws priorities and programmes as envisioned in the CIDP 2023-27. The plan has been prepared in line with the following six key principles; deepening equitable development; acceleration of community-led development through inclusive participation of communities in development at ward level; disaster risk management and resilience building; expansion of water coverage and enhanced access to universal healthcare services.

The ADP comprises of five chapters. Chapter One; provides details on the background information of the County in terms of size, population profile, linkage with the CIDP 2023-2027, preparation process and the enabling legal provisions. Chapter Two; reviews the implementation of the 2022/23 ADP & CIDP 2018-2022, achievements in FY 2022/23, lessons learnt and recommendations for advancement in the planning and budgeting processes. Chapter Three; presents sector/sub-sector strategic priorities, programmes and projects for the FY 2024/25. Chapter Four; provides for the resource allocation frameworks and strategies to enhance resource mobilization. The chapter also outlines the projected resource requirements for FY 2024/25 and indicative development programme ceilings for the FY 2024/25. Chapter Five; explains how the projects and programs will be implemented, monitored and evaluated during the plan period. In addition, objectively verifiable indicators that will be used to monitor the progress of implementation of projects and programs are outlined.

## **CHAPTER ONE: INTRODUCTION**

This chapter provides an overview of the county, the rationale for preparation of ADP and preparation process of the plan.

### **1.1 Overview of the County**

Migori County is one of the forty-seven counties in Kenya. It is situated in the South-Western part of Kenya. It borders Homa Bay County to the North, Kisii and Narok Counties to the East and the Republic of Tanzania to the South. It also borders Lake Victoria to the West. It is located between latitude 1° 24' South and 1° 40' South and longitude 34° 50' East and covers an area of 2,596.5 km<sup>2</sup> including approximately 478 km<sup>2</sup> of water surface.

The total population of Migori County according to the 2019 population census was 1,116,401 persons comprising of 538,187 males (48%) and 472,814 females (52%). The population is projected to increase to 1,292,006 and 1,352,990 in 2025 and 2027 respectively. The county has 12 sub-counties, 32 divisions, 104 locations and 221 sub-locations.

The Sub-counties also form the electoral units/constituencies namely Suna East, Suna West, Nyatike, Uriri, Awendo, Rongo, Kuria East and Kuria West constituencies. These are further sub-divided into 40 electoral wards.

The agricultural sector is the mainstay of Migori County's economy, accounting for 60 percent of total employment. Major food crops grown in the county include maize, beans, cassava, sweet potatoes, vegetables among others while the major cash crops are sugar cane and tobacco. Crops that have potential for large scale farming include sweet potato, coffee, rice, maize, sorghum, and sunflower.

Majority of the livestock farmers in the county rear traditional breeds such as Zebu and Sahiwal and exotic breeds mainly Friesian and Ayrshire, East African Goat, indigenous chicken and bees. Most of these livestock are bred for their sentimental value and are used only in emergencies to cover medical and transport costs, pay school fees, entertain guests and pay dowry. As a result, production of major livestock products has continued to remain low resulting in importation of the deficits from the surrounding counties to meet the huge local demand.

The County Integrated Development Plan (2023-2027) has prioritized investment in the following areas: access to high quality health services through development, equipping and improvement of health facilities and provision of drugs, increased access to quality education in the ECDs and polytechnics, access to clean and safe drinking water, improved road network and connectivity and increased agricultural and livestock productivity. This will be achieved through prudent utilisation of available resources.

### **1.2 Methodology for Preparation of ADP**

The County Government Act, 2012 section 104 and 105 provides that County Governments are responsible for: preparing integrated development plans; ensuring integrated planning within the county; ensuring linkages between county plans and the national planning framework; ensuring meaningful engagement of citizens in planning process; ensuring the collection, collation, storage and updating of data and information suitable for the planning processes; and ensure that no public funds shall be appropriated outside a planning framework.

Public Finance Management Act, 2012 outlines the county planning framework which provides for the preparation of various kinds of plans and among them is the County Annual Development Plans (CADPs). The CADP provides the basis for implementing the CIDP and guiding resource allocation to priority projects and programmes.

The 2024/2025 ADP was prepared in reference with the following article of Public Finance Management Act (PFM) 2012) 126;

1. Every county government shall prepare a development plan in accordance with Article 220 (2) Of the Constitution that include: -
  - a) Strategic priorities for the medium term that reflect the county government's priorities and plans;
  - b) A description of how the county government is responding to changes in the financial and economic environment.
  - c) Programmes to be delivered with details for each programme of-
    - i. The strategic priorities to which the programme will contribute;
    - ii. The services or goods to be provided;
    - iii. Measurable indicators of performance where feasible; and
    - iv. The budget allocated to the programme;
  - d) Payments to be made on behalf of the county government, including details of any grants, benefits and subsidies that are to be paid;
  - e) A description of significant capital developments;
  - f) A detailed description of proposals with respect to the development of physical, Intellectual, human and other resources of the county, including measurable Indicators where those are feasible
  - g) Such other matters as may be required by the Constitution or this Act.
2. The County Executive Committee member responsible for planning shall, prepare the development plan in accordance with the format prescribed by regulations.
3. The County Executive Committee member responsible for planning, shall, not later than 1st September in each year, submit the development plan to the county assembly for approval, and send a copy to the Commission on Revenue Allocation and National Treasury.
4. The County Executive Committee member responsible for planning shall publish and publicize the annual development plan within seven days after its submission to County Assembly

### **Preparation process of the Annual Development plan**

The priorities and needs of the people of Migori County were captured through desk reviews and analysis of data collected from public participation during the preparation of the third generation CIDP and other development plans. Further, the drafting of the ADP FY 2024/25 took into consideration recent data and other policy documents available in the County. The ADP is anchored on the provisions outlined in the Constitution of Kenya (2010), County Government act (2012) and Public Finance Management Act (2012).

## **CHAPTER TWO: REVIEW OF THE IMPLEMENTATION OF THE PREVIOUS ADP (2022/2023)**

### **2.0 Overview**

This chapter presents a review of sector /sub-sector implementation of the previous plan which entails key achievements, challenges faced as well as the lessons learnt.

### **2.1 Agriculture, Livestock, Veterinary Services, Fisheries and Blue Economy**

The sector is composed of three sub-sectors namely:

- 1) Agriculture
- 2) Livestock and Veterinary Services
- 3) Fisheries and Blue Economy

During the FY 2022/2023 the Directorate of Agriculture in collaboration with development partners implemented the following activities; water harvesting structures in Giribe, water reservoirs in Suna West, Siabai in Kuria East and Nyatike sub-counties. The water structures are to enhance food and feed security in the county. The directorate also supplied farm inputs to farmers.

Some of the key activities carried out by the Directorate of Veterinary Services during the reporting period included countywide vaccination exercises against FMD, LSD, Rabies, Black Quarter and NCD in which around 12,000 animals were vaccinated, renovation of two cattle dips at Rokera and Kachangwe in Kuria west and Awendo sub-counties respectively, regular meat inspection and control of livestock movement in order to reduce spread of diseases.

On the other hand, the Directorate of Livestock Production in the last financial year distributed a total of 139 in calf Dairy heifers and 93 Breeding Sahiwal bulls and in the subsequent financial year 2022/2023, most projects were in the procurement process. Meanwhile, over 100 Dairy cows have calved down and over 50 Sahiwal bulls have started serving the intended target Zebu cattle. Further, 48 fodder demonstration plots were done spread across the whole county with bracharia, desmodium, sunflower and soya beans. Supervision, follow ups, trainings, farm visits, field days were also done alongside general extension services to Farmers.

The Fisheries sub sector increased fish production from 18 to 42 MT through the supply of quality fish fingerlings, fish feeds and encouraging the adoption of cage culture in Lake Victoria waters. The directorate purchased and distributed 850,000 pieces of monosex Nile Tilapia fingerlings and 50,000 pieces of African catfish to 850 fish farmers. Four dams (Bondo Nyironge, Silanga, Nyagesese and Nyamome) were restocked with 100,000 pieces of mixed sex Nile tilapia fingerlings. Twenty-eight fish harvesting nets and 50 weighing crane scales were bought and distributed to 28 small aquaculture groups (SAGs). Operationalization of Opapo Mini Fish Processing Plant and Nyangwina Fish Auction Centre in Rongo and Nyatike Sub Counties respectively was realized. For water safety and co-management, the directorate distributed 878 life jackets fishermen and 13 sesse (flat at one end) wooden patrol boats to 13 Beach Management Units (BMUs). Monitoring, control and surveillance was done that netted 19 illegal gears (7 small seines, 5 beach seines, 2 cast nets and 5 monofilament nets) aimed at reducing illegal fishing activities in Lake Victoria waters. The netted gears were eventually burnt upon securing a court order. Additionally, Beach Management Units' (BMU) elections were successfully held, and the officials were subsequently trained on co-management of lake resources.

### **2.1.2 Challenges**

- Under staffing / Shortage of Extension staff that affected extension and delivery of services.
- Weak monitoring and evaluation framework
- Weak research-extension linkage
- Effects of climate change and unpredictable weather conditions.
- High cost of farm inputs limiting amounts that could be procured.
- Inadequate budgetary allocation
- Erratic disbursement of funds from National and County treasury
- Inadequate value addition/processing facilities
- Unstructured marketing
- Inadequate livestock market infrastructure
- Low rates of new technology adoption
- Untimely disbursement of funds
- Untimely procurement of supplies hindering planned activities
- Erratic weather conditions

### **2.1.3 Lessons learnt and recommendations.**

- There is need to start the procurement process early enough.
- There is need of strengthening of the extension services in order to reach all the farmers timely.
- Proactive emergence management of emerging issues
- Use of virtual meeting technology helps in minimizing the costs.
- Promote adoption of e-extension
- Use of digital platform for extension services
- Adoption of e-marketing
- Need to adopt climate smart agriculture
- Staff recruitment

## 2.2 COUNTY ASSEMBLY

The county Assembly is majorly composed of the following two sections.

- 1) The office of the Speaker
- 2) The office of the clerk

### 2.3.3 Sector Challenges

- Lack of policy on the management of Pre-primary Education, Vocational Training
- Lack of good co-ordination between the consumer department, finance department and the works department on initiation and execution of projects.
- Inadequate allocation of funds for Research, Monitoring and evaluation.
- Delay of funds from exchequer for Devolved functions
- Underfunded school systems – The Government’s capitation to schools is inadequate hence pushing the institutions to strain their programmes in a stretched term of learning.
- High teacher-child ration – 100% transition to secondary schools has led to inadequate learning facilities.
- Numerous requests for infrastructure development i.e. ECDE classrooms, VETC workshops, Administration blocks and dormitories
- Inadequate professional development for both ECDE teachers and VETC Instructors
- Natural calamities like floods destroying buildings.

### 2.3.4 Lessons learnt Recommendations

- Increase Government capitation to schools to cater for infrastructure development.
- Building resilient education systems for equitable and sustainable development and to equip it to cope with crises like Covid-19 pandemic.
- Enhanced Government-Private sector partnership in education – work with all stakeholders and private sectors to explore education potentials.
- Training and employment of more teachers to stabilize the ratio of teacher-pupil at 1:25
- Stable political environment is key for economic development.

## 2.4 ENVIRONMENT, NATURAL RESOURCES, CLIMATE CHANGE AND DISASTER MANAGEMENT

The sector is comprised of the following subsectors:

- 1) Environment
- 2) Natural resources and forestry development
- 3) Climate Change
- 4) Disaster management

### 2.4.1 Summary of key achievements in FY 2022/2023

During 2022/2023 the department successfully undertook routine garbage collection, acquired one 10- tone truck and constructed 4 waste transfer stations. Rehabilitation of degraded hilltops including Mirema, and Ottacho Hills and conservation of R. Oyani was also done.

In addition, the department developed a framework for the County Greening programme that include procurement of indigenous tree seedlings (instead of exotic ones) and seedling distribution and tree planting in public institutions.

To strengthen fire disaster response, the Department established fire safety and compliance procedures including recruitment of staff in the fire section.

On climate change interventions, the Department constituted 11 climate change planning committees, enacted The Migori County Climate Change Act, 2021 and The Migori County Climate Change Fund Act, 2021. The department also sensitized the Migori County Assembly members on climate change legal frameworks.

Other achievements by the department include development of draft Sand Harvesting Regulation and database for leaching plant owners within the County,

Electronic Medical Records (EMR) usage has been successfully expanded in Rongo SCH, Awendo SCH, Kehancha SCH, Suna Ragana Dispensary, and Ngodhe Health Centre in Rongo sub-county. Data cleaning has also been completed in MCHUL, KHMFL, and KHIS databases. Important milestones have been achieved, including regular Data Quality Assessments (DQAs), performance reviews, and training on Health Management Information Systems (HMIS) tools and systems.

**Service Delivery:** In overall HIV 90-90-90 cascade, the county achieved 94-99-95 respectively. The proportion of HIV positive pregnant mothers on PMTCT HAART remains at 99%. LLINs coverage among pregnant women improved by 18% (64-82%). Malaria positivity rate increased from 41-49%. On Non-communicable diseases, mental health cases reduced from 221/100,000 pop to 115/100,000 population, cervical cancer screening maintained at 29% below the target of 35%. The reproductive health indicators equally improved; Proportion of Adolescent pregnancies receiving first ANC attendance (21- 20%), 4th ANC improved from 52-63%. Skilled delivery coverage improved from 84-92%. The percentage of pregnant women who received iron folate reduced by 1% from 90% to 89%, FP coverage for the general population increased from 36-56%. Notably the FP uptake among adolescents maintained at 30%. MR2 slightly improved from 52-55% and the national target is 80%. On environmental health indicators, % of households with toilets equally improved from 66% to 87%, % of households with handwashing facilities from 63% to 81%. However, maternal death still remains high though the department realized a slight decrease from 104 to 82/100,000 live births.

### 2.6.3 Sector Challenges

- Exiting of development partners affecting preventive and promotive programs
- Insufficient health financing to provide comprehensive health services,
- Insufficient staff to operationalize the newly established health facilities.
- Delays in initiation of procurement process as a result of the transition of government also hampered the delivery of health services.

### 2.6.4 Lessons learnt and recommendations.

- The need for strengthened collaboration to address cross cutting issues such as teenage pregnancies and gender-based violence.
- There is also a need for timely initiation of the procurement processes to ensure uninterrupted availability of health commodities at facility level.
- Timely settlement of pending debts especially for KEMSA can help improve lead time for the resupply of commodities.

- There is also need to scale up digitization of health services to enable efficiency in provision of health services.

#### 4.2 How the county is responding to changes in the financial and economic environment

The County Government of Migori is committed to implementing Programs and projects identified in line with County and National Development Blueprints including the Governor's Manifesto, Sectoral Plans, Bottom-Up Economic Transformation Agenda (BETA), Vision 2030, among others. To achieve this, the County Government will; Enhance own source revenue (OSR) and public-private partnership structure that will help in infrastructure development.

The government is also taking measures to enhance food supplies in an effort to alleviate food insecurity and reduce prices. Such measures include; development and promotion of irrigation through construction of dams and water pans, provision of farm inputs to farmers among others. The county government will also invest in greater resilience to the impacts of climate change and identify opportunities to reduce vulnerability.

In efforts to reduce the unemployment rate, the county government will: promote local manufacturing and production, support the creative industry by providing a conducive working environment, support youths to create jobs by offering entrepreneurial and technical skills, offer business grants, promote and provide quality and holistic education that imparts relevant skills for future use among the learners through construction of ECDE classrooms , development of infrastructure in technical and vocational education centers (TVETs), capitation , scholarships and bursaries.

To address the issue of pending bills, the county government established a pending bills resolution committee to verify and prioritize payment of eligible pending bills. The committee is tasked with the auditing of liabilities. The county government shall ensure that pending bills take the first charge on the 2024/2025 budget. The county government will also ensure that funds are adequately provided for within the expenditure ceilings. In addition, the government will ensure that repayment plans are in place and ensure that the procurement plans align with the disbursement of funds.

Other measures that the county will put in place include; Strong budgetary controls, Prompt submission of financial and non-financial reports to the office of the controller of budget, adherence to public participation requirements for efficiency and targeted spending, continue to maintain the wage bill threshold (not more than 35% of the total revenue) and Prioritize implementation of development projects.

## CHAPTER FIVE: MONITORING AND EVALUATION

This chapter discusses the county monitoring and evaluation framework as outlined in the county monitoring and evaluation system (CIMES)

### **Institutional Framework for Monitoring and Evaluation**

The Ministry of Planning under the Monitoring and Evaluation directorate has developed the National Integrated Monitoring and Evaluation System (NIMES). Under the system, all monitoring systems are incorporated into the national system; the monitoring systems at the sub-County levels will feed into the County level which will, in turn, feed into the national system.

County Assembly Committees, County M&E committee (CoMEC), Sub County M&E committees (SCoMEC), M&E Unit and Sector Monitoring and evaluation Committees (SMEC) will conduct continuous monitoring throughout the plan period.

### **The County Monitoring and Evaluation Committee (Comec)**

The CoMEC will ensure that the County Executive Committee (CEC) and County Assembly have good quality information needed to make decisions and to lead and direct County initiatives. To do this, the CoMEC will provide quality assurance by verifying whether the M&E information given in the reports and the underlying data collection and analysis processes are of the needed quality and conform to the M&E requirements outlined.

The CoMEC will also oversee the overall County compliance and results of projects implementation and service delivery within the CIDP3 and ADPs. The CoMEC will be charged with preventing duplication and wastage and providing the evidence base for policy making and management.

### **Data Collection, Analysis, And Reporting Mechanisms**

Data collection methods will depend on the kind of indicators. The most common data to be collected will be the qualitative and quantitative data.

#### ***Qualitative data collection mechanism***

Some of the mechanisms that will be used to collect this data include:

- i. Before/after surveys, questionnaires, and;
- ii. Departmental reports, agency reports, statistical records.

#### ***Quantitative data collection mechanism***

- i. Field observation visits;
- ii. Stakeholder meetings;
- iii. Interviews; and
- iv. Other M &E tools e.g. project management software.

#### ***Mechanisms of data analysis***

Data collected will be analyzed to give meaningful results. Content analysis will be used to identify and organize information to understand new opportunities. Secondly, triangulation method will be used to take data, find themes, code and then compare data collected from other sources.

### ***Mechanisms of data reporting***

The County will be required to have a strategic reporting system that will enable information to be retrieved quickly and easily. At the County level, the M&E Unit will be an important player in the production of M&E information.

In a legislative context, CIMES (County Integrated Monitoring and Evaluation System) reports on how County government programmes and operations are to be submitted directly to the County Assembly and the Senate on a regular basis, through ADP reviews and CoMEC reports. The aim is to enhance the transparency and accountability of County government operations with members of the County Assembly and County residents.

County Monitoring and Evaluation progress reports (COMERs), will also contribute to the national Monitoring and Evaluation report. They will be submitted to MED according to the CIMES requirements. While it is the responsibility of the County to plan and manage internal reporting, taking the electronic approach of e-CIMES means that data gathered at each devolved level can be automatically aggregated from village to ward to sub-County to County.

In order to play its role in the national APR reporting timetable, the County will adopt the following schedule:

- i. Sub-counties, through the SCoMEC, and the sectors, through the SMEC, will submit their reports to County M&E unit.
- ii. County M&E unit will, thereafter, compile the County M&E report for onward submission to CoMEC.

At an operational sectorial level, CIMES will be expected to serve as a learning tool to assist in programme/project improvements and developing sound management practices. At the level of an individual County department, with the CECM accountable for good governance and performance of the department, CIMES will represent a key management and accountability tool for the CECM and provide important inputs to strategic reviews that may be required to make management decisions regarding programme/project priorities and possible changes.

### ***Mechanism of Data Dissemination***

Data will be disseminated through publication of reports, news releases, press conferences or the County website. To facilitate a smooth decision-making process, all agendas of relevant County meetings will include a review of indicators and sector progress reports as a standing item, with full reporting documents sent in advance to the participants.

Where possible, progress reports will be available in an electronic format, and will combine data and associated narrative commentary and evidence.

Eventually, the County will automate the production of reports in a way that, once data is entered, it can be viewed at the click of a button and can automatically be populated in all other required formats.
